

AMENDMENTS TO THE SPECIFICATION

A verified English translation of the filed specification is provided herewith.

A marked-up specification of the verified English translation has been provided herewith to put the specification in a form which is in accordance with USPTO guidelines, along with a clean version of the marked-up specification which serves herein as a substitute specification.

Paragraphs [0001], [0027], [0048], and [0081] have been added to the verified English translation, as seen in the substitute specification, which serves as the basis from which all amendments are made, simply to comply with requirements of normal U.S. patent practice. No new matter is added in doing this.

Paragraph numbering and headings have been added to the verified English translation, as seen in the substitute specification, which serves as the basis from which all amendments are made. No new matter is added in doing this. The headings have been inserted as follows:

“Cross-Reference to Related Applications/Incorporation by Reference” between the title and newly added paragraph [0001];
“Technical Field” between [0001] and [0002];
“Background of the Invention” between [0002] and [0003];
“Summary of the Invention” between [0027] and [0028];
“Brief Description of Several Views of the Drawings” between [0048] and [0049]; and
“Detailed Description of the Invention” between [0052] and [0053].

The phrase “What is claimed is:” has been added after the “Claims” heading.

Some other minor changes have also been made, as seen in the marked-up specification, to take care of some minor informalities.

The substitute specification is provided herewith, with the abstract being the final page of the substitute specification.
